

Brown Paper Giftwrap

Items needed (quantity per creation)

- Brown craft paper (packaging paper will work fine here)
- White paint / correction pen (depending on design)
- Paintbrush (thin or wide depending on design)

Instructions

Making wrapping paper is very easy. Below are four beautiful designs to try on craft paper. Remember to make enough to wrap the gift.

1. Galaxies - Use the correction pen to draw constellations onto the paper. Draw a * for big stars and connect some with dashed lines. Add small dots for other stars.
2. Busy brush - Using a thin brush make white strokes on the paper in different directions. Start with your brush on the paper and pull in one direction till the paint stops spreading.
3. Brush strokes - Use a wide paint brush, lightly dip it into the white paint and pull across the paper. This makes a beautiful streaky design.
4. Splatter - Use a thin brush and load with paint. Use your finger to flick the paint onto the paper. Speckles everywhere.
