

# Melted Candycanes

## Items needed (quantity per creation)

- Christmas Cookie Cutters
- Candy canes
- Oven
- Cookie sheet
- Aluminum foil
- Cooking spray

## Instructions

Here's a fun Christmas craft to make this year! These make great ornaments and smell amazing. You could wrap them in a bag with a ribbon for gifts too.

1. Preheat oven to 175° C. Line a baking sheet with aluminum foil and place your cookie cutters on top. Spray lightly with cooking spray. Arrange pieces of candy cane inside so they are in a single layer as pictured.
2. Place in oven for 2 minutes. Pull them out and gently push down to fill all the cracks and place them back in until they are slightly puffed, another 1 minute. Watch them carefully or you will have a melted sugar mess like I did the first time!
3. If you want to put ribbon through it, wait a few minutes after you take them out of the oven and then use a skewer to make a hole. Let them cool completely, snap off any small bits that have leaked out the sides and push the sides away from the candy cane. (Pushing down tends to break them). You're done! Beautiful!
